# Homework 7 Reflection

## Glen Madsen

## April 23, 2018

1. In retrospect, what could you have done better to reduce the time you spent solving this assignment?
I could have had a better understanding of how to apply the design patterns, instead of just understanding the basic idea.

2. What could the Principles of Software staff have done better to improve your learning experience in this assignment?
A type of lab or more assignments would have been helpful to ease into design patterns first.

3. What do you know now that you wish you had known before beginning the assignment?
I wish I had known how much of a balance we needed between letting composite do everything and making sure NotExp, AndExp, and OrExp had methods.
